Title of Invention:
Hands Free Solar Powered Cap/Visor Integrated Wireless Multi-Media
System

Dear Sir,

Enclosed please find one copy of your notice to file corrected application papers and one new set of drawings adjusted to provide the appropriate margins as required.

In further reviewing the original patent submission, I realized that several drawings were inadvertently omitted from the paragraph titled "Brief Description of the Illustrations", and I would like to provide those entries now:

Fig 10 illustrates an alternate embodiment for the drop down display, this being the full-face display.

Fig 11 illustrates a concept for applying external memory devices to the electronics module.

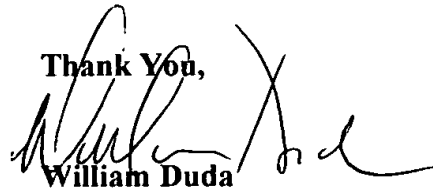

I also have several questions to which hope you are at liberty to offer some guidance:

1. At this stage of the patent review and approval process, am I at liberty to actively market the concept or product and afford the legal protections available to me under the proviso's of the "patent Pending" authority?
2. Can you offer any guidance regarding the processing of foreign patents particularly in Europe and Japan/Korea? Is there a web page or other reference guide that might give some insights into the timing of that event, the process, and the fees?

3. Your professional opinion as to the validity of this patent, given that it answers some of the most urgent needs of the cell phone user community;

Hands free
Solar powered
Antenna RF safety

Thank You,

William Duda
